DETAILED ACTION*Allowable Subject Matter*

1. The following is an examiner's statement of reasons for allowance: Claims 1-18 are allowed because of the following reasons:

The applicant's admitted prior art (AAPA) disclose the claimed invention except for each bolt having a rotating ball provided at inner end and providing a rolling contact with the external surface of the laser module.

FIG. 3

Art Unit: 2828

Satake (US Patent 5659645) discloses in Figures 3 (above) an assembly as claimed with a plurality of bolts and a plurality of pins. However, Satake does not teach the bolts each having a rotating ball. Moreover, Satake only teach the alignment assembly of fiber, not for laser module.

Since there is no motivation or suggestion in the prior art, the claimed invention is distinct from others and allowable.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Citation of Pertinent References

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to Satake discloses Collimator with Adjusting Mechanism for Improved Alignment between Optical Fiber and a Lens, U.S. Patent No. 5659645

Art Unit: 2828
